

IN THE CLAIMS:

Please cancel claims 7-9 and 11 without prejudice to or disclaimer of the subject matter recited therein.

Please amend claims 10 and 12 as follows:

LISTING OF CURRENT CLAIMS

1. (Original) A plasma display device, comprising:
a plasma display panel; and
a heat-dissipating plate, mounted on the plasma display panel and thermally connected to the plasma display panel through a laminar attachment structure; wherein the laminar attachment structure comprises an annular channel which divides the laminar attachment structure into an outer closed portion and an inner portion and communicates with the external environment through at least one vacuum-pumping aperture formed at the heat-dissipating plate.
2. (Original) The plasma display device of claim 1, wherein the laminar attachment structure is a thermal pad.
3. (Original) The plasma display device of claim 1, wherein the laminar attachment structure is an adhesive double tape.
4. (Original) The plasma display device of claim 1, wherein the inner portion of the laminar attachment structure comprises at least one trench which divides the inner portion into at least two separated regions.
5. (Original) The plasma display device of claim 1, wherein the at least one vacuum-pumping aperture is disposed above the annular channel.
6. (Original) The plasma display device of claim 4, wherein the at least one trench of the inner portion of the laminar attachment structure communicates with

the external environment through at least one vacuum-pumping aperture formed at the heat-dissipating plate.

Claims 7-9. (Canceled)

10. (Currently Amended) A plasma display device, comprising:
a plasma display panel; and
a heat-dissipating plate, mounted on the plasma display panel and thermally connected to the plasma display panel through a laminar attachment structure having a plurality of strips spaced apart from each other by a plurality of spaces; wherein a respective guide trench is disposed between each pair of the neighboring strips to guide out the air within the spaces of the plurality of strips, two ends of at least one of the guide trench are sealed to form a closed region which communicates with the external environment through at least one vacuum-pumping aperture formed at the heat-dissipating plate.

10
Claim 11. (Canceled)

12. (Currently Amended) The plasma display device of claim 11 10, wherein the space is about 3-20 mm. 3mm to 20mm.

13. (Original) The plasma display device of claim 10, wherein the laminar attachment structure is a thermal pad.

14. (Original) The plasma display device of claim 10, wherein the laminar attachment structure is an adhesive double tape.
